‘ Describing the hell of depression to other people, even those who really want to help, is a task that many sufferers find it impossible to reach out. Matthew Johnstone’s cartoon book and his own black dog cuts through the taboos in a simple, effective way.

‘This brilliant, disarming book about depression is quick to read and easy to understand.

Foreword

When Matthew initially said, 'I have depression', I really had no idea what that meant. We were in love, the future looked bright, and I just thought we could face whatever came.

I had never dealt with depression and I certainly didn't know how it could and would affect us.

Which, in many ways, is exactly why we decided to create this book.

Caregivers live in the shadow of the Black Dog. As with any illness they take turns and what to do. Often they feel like they are walking on eggshells which can be a very stressful and isolating experience.

However, the caregiver's role is a vital one. It can have an immeasurable impact on the sufferer's recovery. It is often the caregiver who is able to monitor the sufferer's healing process outside doctor visits.

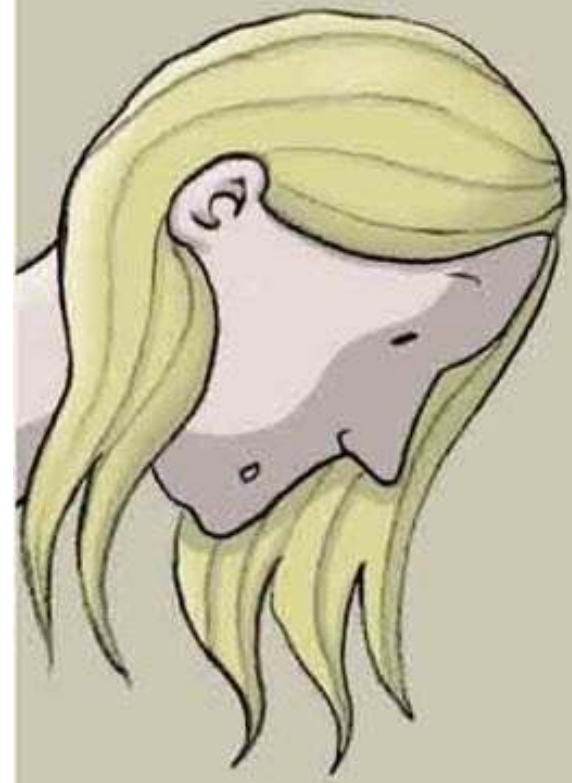

They also have a better understanding of the sufferer, their situation and circumstances.

Talking to people who shared a similar path to mine while researching this book was incredibly comforting to know you are not alone.

Recovery is all about acceptance and management by both the sufferer and the caregiver through honesty, diligence, compassion and as much humour as possible.

It certainly put the old marital saying 'in sickness and in health' to the test but it was the path of a deeper and more meaningful relationship.

We hope this book will shed some light into what your loved one's Black Dog illness, not a life sentence. It does pass.
