Contents

Chapter 1. Relevance of Neuroscience to the Business Environment

What Is “Brain Science”?

The Development of Brain Science

How Does Brain Science Relate to the Personal, Managerial, and Organizational Problems That Coaches Face?

How Does the Application of Brain Science Help Coaches Deal with Their Clients More Effectively?

More Examples of How Brain Science Concepts Enhance Coaching When Dealing with Problems and Traps That Leaders Face

A Map of Where the Book Is Going and What the Coach Will Take Away from It

Conclusion

References

Chapter 2. How Does Positive Thinking Affect the Business Brain?

The Context

The Impact of Negative Emotions on the Brain

The Concepts

Concept 1

Concept 2

Concept 3

Concept 4

Concept 5

Summary of the Concepts as They Are Relevant to Coaches, Managers, and Leaders

The Impact of Negative Thinking on the Brain

Concept 1

Concept 2

Concept 3

Concept 4

Why Should Leaders Be Optimistic?

The Concepts and Their Applications to Coaches, Managers, and Leaders

Concept 1

Concept 2

[Why Positive Emotions Matter](#)

Chapter 5. The Challenge Prior to Change: How Brain Science Can Bring Managers and Leaders from Idea to Action Orientation

[Why Is Change Such a Challenge in the Human Brain?](#)

[Competing Forces](#)

[Biased Choice Value](#)

[Conditioning](#)

[What Is Happening in the Brain When Conditioning Occurs?](#)

[The Entrapment of Context](#)

[Motivated Reasoning](#)

[The Fundamental Concepts in Change: A Working Model](#)

[The Neuroscience of Commitment](#)

[Imagery vs. Observation](#)

[Action-Oriented Questions](#)

[Noise Reduction](#)

Stimulate Short-Term Memory

Address the Emotional Elements Affecting the DLPFC

Conclusion

References

Chapter 6. From Action Orientation to Change: How Brain Science Can Bring Managers and Leaders from Action Orientation to Action

Organizational Context for Change

Model of the Relevance of Brain Science to Understanding Change

Relationship of the Neuron to Brain Change

Evidence that Brain Change Is Possible in Adulthood

Task Switching and the Brain: Relevance to Change

Memory and the Brain: Relevance to Change

Ironic Process Theory

Action and the Brain: Relevance to Change

Emotions and the Brain: Relevance to Change

Conclusion

Acknowledgments

I would like to acknowledge all those who believed that no meeting of ideas is impossible; in particular, the faculty of Wharton Business School and the people at FT Press. I would also like to acknowledge the continued inspiration of all those members of NeuroBusiness Group who have joined me in applying these basic principles to improve the lives of so many managers and leaders. Thanks to Alice Domar and Dave Ostrow for their generosity of spirit. And to Perry Zeus and Hendré Coetzee for encouraging me to pursue this line of thinking. Thanks also to Shervert Frazier for teaching me that understanding human psychology can be applied to any domain of human life and to Lester Havens for convincing me that the answers lie inside and that real power lies in the vulnerability of being human. Finally, to all those who love me and to those who allow me to love you—I could not have done this without you.

About the Author

Srinivasan S. Pillay, M.D., is a certified master executive coach, brain-imaging researcher, and Assistant Clinical Professor of Psychiatry at Harvard Medical School. He is also the Founder, CEO, and President of NeuroBusiness Group—an executive coaching company with coaches trained in the application of brain science to profitability and personal satisfaction in the business environment. Dr. Pillay has taught these methods with very high acclaim to executives from many companies, including but not limited to McKinsey, The World Bank, The MITRE Corporation, Genzyme, Novartis, ARA, Banks of North America, CEO Clubs of Greece and Boston, Coca Cola, Pepsico, and Microchip. He has worked with coaches in a teaching or collaborative capacity from The Forum Corporation, Mobius Executive Leadership, and Triad Consulting. In addition, he has been invited to present his work in Boston, New York, Los Angeles, London, Switzerland, Greece, and Singapore, and his most recent presentations have been to executives from Africa, Asia, and the Middle East. Dr. Pillay is also the author of *Life Unlocked: 7 Revolutionary Lessons to Overcome Fear* (Rodale, August 2010), and he also writes for *The Huffington Post* and *Psychology Today*.

He is extensively sought out as a speaker and by the media. Select media appearances related to his business experience include *The Financial Times* in Greece, *Epoca Magazine* in Brazil, *Forbes Magazine*, *The Pittsburgh Post Gazette*, *Investors Business Daily*, *Atlanta Journal Constitution*, and the *Sarasota Herald Tribune*. Aside from his work on applying brain science to improving business performance, Dr. Pillay is also regarded as an international expert in burnout, stress, and anxiety, having been the Director of the Outpatient Anxiety Disorders Program at Mclean Hospital, which consistently ranked the top freestanding psychiatric hospital in the United States for the past 20 years. Dr. Pillay lives in Newton, MA, and works out of Cambridge, MA.
