## Part 1

ship is sexual erotic enjoying with its living tissue

first text

---

<https://archive.org/stream/TheLivingAndEnjoyingShiphull/shipulllivingenjoying.txt>

shipull material made of living plants thc cannabis, psilocybin mushroom microalgae

ship is sexual erotic enjoying with its living tissue it can give and receive sensual pleasure it has possibilities to increase its blood flow into certain

areas where it is open too to body fluids from humans animals plants compost as well as blood and semen and vaginal ejaculations dna exchange via sexual intercourse but also trough caressing stroking

—— fertility rite humans putting penis into mother earth —— field

ship personality grows with its emotional, sexual, mental exchanges with both its inhabitants and v internet with

also lifeships can come together, exchange dna, enjoy in sexual intercourse

ship has nervous system similar to animals and humans

two ships can become one physical, reshape them from dna exchange, via internet mentally but also via whole body sexual intercourse

---

the evolution of mary the lifeship

perma and mary with maima shared the admiration of mother natures mechanisms and working biological

sexuality and reproduction. if humans would want... or ascende's thought ...

if i want to transcend into a being what has no need for killing eating plants... if i want to become independent from mother earth... i better start enjoying eating more for in the joy there lies the answer to hunger

hunger ceases in times of marryment

perma, maima, mary were joining in with their thoughts,

mary: i feel too a sympathetic wave rising within me towards the goal of man- and womankind complete full circle with

the killing. and myself i could greatly profit from you perma and the animals what live within me...

\$when your digestion would be mainly fine tuned smell, taste, hear, see, touch

---

if you would live more from the aetheric energies like i use to power my antigravity propulsion drive... then my interaction with you could come to another level...

ascende: you say if i, perma and the animals what live inside you, we eat less, but experience more  
nourish

ourselves with satisfactory sensual inputs... we might discover within ourselves a free energy  
overunity antigravity mechanism

stop killing eating plants but unite, merge, dance, cuddle with them ?

mary: ya and cuddle i want too... even more i would like to enhance my dna of microalgae, cannabis  
funghi

psilocybin with your human dna what you can give to me with pleasure sensation of ejaculating in  
my body

like maima who is made by flesh grown from your cells... i would like to ingest in a pleasure way  
your semen

perma: may i also contribute to your quickening... your awakening with my vaginal ejaculation and  
my menstruation blood ?

mary: oh yes, i would like that so much

we all four enjoying orgasmic reunion in a physical bodily exercising manner

i am sure i can direct my body fluids of living microalgae, cannabis essence and mushrooms into  
warm mushy area with

swelling bodies... so it too will provide you with my very personal formula, with a lifeships semen  
blood ecstasy fluid

it might eventually be a possibility for all of us to reach this level where no one aboard is hungry.  
everyone drinking,

soaking up through skin and genitals the other ones essence in times of highest pleasure coitus

maima: mmmh... like the nectar, we would enjoy is the diversity of your gene pool... and taste of  
semen and body fluids

is pleasure food... i have not yet built genital organs...

have you thought of the genital form yet mary

how i and you could rub each other most intimately ?

perma: i feel moist between my legs and my vagina smells nicely... ascende would you like licking

some of my juice right now ?

---

ascende: with the utmost pleasure... mmmh... thats a tangy sweet fresh pussy juice i sense on my tongue...

perma: please may i swallow your penis for your semen

ascende: wow of course...

perma was very happy to take ascendes penis into her mouth, she instantly sucked and played with her tongue around the tip of ascendes penis... after a minute or two she tasted some fluid from the penis and continued sucking and fondling ascendes penis with tongue, teeth and whole mouth until he ejaculated into her mouth. she swallowed half of the semen and kissed maima with the sperm in her mouth... perma and maima having kissed intensely before.

maima went down to perma's crotch where ascende still was kissing her labia and also anus caressing with his tongue. maima kissed ascende on his lips and shared some of this semen what she got from permas mouth where he had delivered it just moments ago.

maima had swallowed before some half of ascendes sperm. now maima was indulging into permas dripping vaginal opening

perma being now near climax when ascende inserted his again erect penis into her anus ... he had transferred some of her vaginal fluids with his mouth onto the anus and it was readily opening... perma being vaginally licked by maima and anally slowly filled and gently pushed by ascende... she reached out to the lifeship mary ... please mary unite with me before this coming orgasm ... what spontaneously could grow extensions of herself in form of tentacles... three tentacles with openings were coming into the anus of ascende, one tentacle very thin was going into maimas nose to connect to her brain and another tentacle was seeking its way to permas mouth

perma was so thankful she could close her mouth around marys extension... being caressed by tongue and penis and tentacle... her giving pleasure while feeling ascende enjoying both his anus being penetrated by mary tentacle as well as being inside her darm bowels

she roared loudly as the flood gates of her orgasms were opening... marys tentacles as well as maimas mouth were sucking up the in the orgasm released fluids.

after this celebration of sexual orgasmic fluid exchange...

mary too did release some of her essence via tentacles into maima and permas mouth and ascend  
anus— the interaction on board went much more  
physical... instead of talking many times of all them touched each other, cuddled together and  
rubbed their swelling bodies saliva too  
exchanging in kisses was helping to come online with each other... feeling each others wishes  
desires and intentions

---

## **Part 2**

**ascende, perma and the magic pools in an alternative dimension and or a parallel timeline, ascende and perma were meeting for the first time in nature.**

---

<https://ia902509.us.archive.org/33/items/ascendepermaandthemagicpools/AscendePermaAndTheMa>

<https://archive.org/details/ascendepermaandthemagicpools>

i was thinking about this material already last year at the wild river sense ... when i wrote this text

<https://archive.org/stream/TheLivingAndEnjoyingShiphull/shiphulllivingenjoying.txt>

( to understand the context i wrote it in, like ... the wild river place .

<https://archive.org/details/faschzweitaegundeinachtarsense> )

some weeks ago i had this idea of it all possibly happening without industrial activity, with iron dust

rubbed off from big rocks ( the ones where it looks like some orange fluid flows out of them ... )

wrote in german about it at <https://www.facebook.com/mayloveheal/posts/761997393824092> ... but

forgot today afternoon to mention the iron dust... mmmh...

this text i wrote today being a parallel development to the story i wrote in 2007

<http://www.novlet.com/stories/passages/584> <http://archive.org/stream/ascende/ascende.txt>

ascende, perma and the magic pools

in an alternative dimension and or a parallel timeline, ascende and perma were meeting for the first

time in nature. ascende being tired of waiting for the

abundance scheme to arrive, tired of society postponing to do the obvious to save mankind from

harming the delicate balance on mother earth even further.

he was well read about alchemy and magic traditions as well as the esoteric possibilities where one

does not actually need the society to grow in

consciousness but instead the practitioner itself shall create for him- or herself a space both physical

and mentally emotional... a space what is most free

of outer demands and allows the experimenter to dwell into the subjects of one's desire.

in the case of ascende, he wished for himself and also everyone... a liveship and a companion, a

assistant.

this way predestined he walked away from the city where he lived... walked into the forest, where he

met perma. she herself was on a quest quite similar to

ascende's wishes. her wish and goal was to find a space in nature where she would be undisturbed from

other human beings. and there she would plant food and

build a shelter for herself. with most respect for the wild setting, to intrude the least possible, to blend

in with utmost elegance...

so, wandering they both were, when they reached a wild little river where there was a big long rock

its middle. and in this rock then were several pools.  
fascinated from this sight, they both approached the pools from different directions. with their eyes  
mostly on the slippery ground of the shallow river, they  
noticed each other only just at the pools. a moment of silence followed their first eye contact...  
silence where they innerly asked themselves about the  
meaning of this meeting... they both were set to start a new life in solitude, away from the desires  
human company and the pressure of societies... and now  
this. so they started to smile at each other, guessing eventually their littlemindedness and sil  
backward isolationism ways ... perma voiced first ... and i  
thought i could live a life in solitude now ... with the smile on her face morphing into a wide happ  
grin. ascende now said ... so was i on my way to the  
eremits sanctuary ... i guess we might evaluate our plans some more carefully ... having said that, i  
started to laugh out loudly... with perma joining in.  
it did not take long before they took of their clothes and without shyness bathed in the little river  
showed each other their discoveries in plants, little  
animals, interesting nature signatures in the rocks...  
later this evening, they gathered wood to light up a fire. having found some fruits, leafs and roots they  
ate raw beside the warming fire, they both talked  
openly and extensively about their goals what they thought have led them here. being thankfull for the  
meeting they both were, reading it even as a sign  
towards a perhaps not solitary future... . content about this day they lay beside the fire, holding each  
other softly and drifting into the otherworld.  
the next morning, neither of them wanted to leave this place, so they just stayed, continuing their fru  
gathering, searching for edible leafs and roots,  
bathing, cuddling and fondling each other, orgasming all over the place in all kinds of sexu  
activities. having satisfied their hunger on each other a tiny  
bit ... ascende was summoning up his knowledge or guessings or speculations how possibly he wou  
be able to will a lifeship into existance, or a  
companion... when he found himself watching the little animals in one of the pools, the alg  
threads... and suddenly it came to him... how about this pools  
serving as a magic cauldron, a vessel to work with, for the juicing of the great labour ... . exited b  
started listing the possible ingredients in his  
mind ... my own urine as the most important one, as the connection between my body and the body  
the lifeship and the companion... also to nurture the  
algae. then cannabis flower buds for their thc intelligence... mushroom strong in psilocibin powers.  
datura wisdom... it all most untreated or as soft as  
possibly introduced into the pond. ideally. the cannabis and mushroom growing near and only the  
wind transported essence coming into the pond... but this  
perhaps later. for the beginning, i would have to start with a stronger more physical elixier ...  
course it needs me to watch it many hours a day, let it  
enchant my mind and feelings with its graphics, changings of form and colour... regularly i wou  
taste some of it, give some on my skin... wash my face and  
hands with it so that it both will impregnate me as well as my skin surface bacterias will join th  
pool... . as he was laying beside the pool, painting this  
inner picture of a noncooking, raw food style alchemical setting ... perma came back from one of h  
many walks alone gathering edibles. she was the one of  
them both who knew and or sensed most what could be digested easily. she saw his happy thinkings o

his face expressions... and asked him about it while  
offering some berries and nuts. as he told her, she became interested ... and although her goals still  
were to live a simple life in a permaculture way ...  
there was a part in her what was fascinated by the idea of creating a new kind of living material.  
material what would respond to ones desires and wishes.  
so she suggested to him that she would like to help... eventually their juices unified charged with  
joyfull ecstatical sexual comings... she talking like this  
aroused them both so they rolled onto each other and into on of the pool, moaning groaning fuckin  
licking and ejaculating into each other... vaginal  
ejaculation, semen, algae and water all over their bodies... they painted symbols and spontaneous  
forms onto each others bodies, abwechselnd licking some of  
it off, getting into heat again and ejaculating anew ... verstreichen it anew onto each other and  
washing themselves in the pools... what a start of the  
journey...

.....

<https://www.facebook.com/mayloveheal/posts/761997393824092>

i was thinking about <https://www.facebook.com/mayloveheal/posts/759144314109400> ... where  
envision a kind of raw food approach to alchemy in search of the next building material ... as i am  
still waiting for my very own personal spaceship what will allow me to travel everywhere and live  
autonomously with plants and funghis and bioreactors inside ... i got this idea for an ascende  
chapter ...  
so, here is some of it ... i wonder when or if i will write further, perhaps some times at the sense  
because at the sense and schwarzwasser are some rockpools ...  
perhaps some more details will come to me about what possibly two beings can enjoy in with the  
natural alchemical pool... .

---

ascende, perma and the magical rockpool  
parallel timelineasce and perm stay around the rockpoolwash themselves in it make love with in it  
dance meditate mix their urine together meditate and drink from it at the beginning they ate fruit and  
smoked and ate the herbs the mushroom also some cannabis flower buds and psilocibinoi  
mushrooms they lay into the pool

---

the parallel timeline thing is ... some kind of explanation ... for a space and time where ascende and  
perma are both evolving themselves, their relationship and also the material .. with what perma will  
build her house with and ascende his lifeship ... this being parallel to the original story where the  
global society as a whole in an act of charity and empowering every human being ... . donates a house  
a lifeship or something similar to everyone allowing everyone to sustain her/himself ...  
in this parallel timeline ... . it is not the society as a mother/father figure what comes to the rescue  
initiates change ... but the individual itself uplifts him/herself in community with fellows out  
mostly own strenght and focus on the inner powers

ursuppenstyle

BODY;CHARSET=UTF-8;ENCODING=QUOTED-PRINTABLE:when maima finished her adult becoming

process not within the usual time span of one

year with some animals or plants to 20 years with maimas human genetic heritage..

her new level of being a sovereign cosmic being

was neither human or plant or animal. nor was maima in its first hours child or adult...

it was at a next height were it could choose

from a wide variety of genetic qualities, transcending the etticetts human or animal

or plant. its genes were drawing themselves  
remixing adjusting inventing experimenting without end... not only was maima listening  
to its fellow friends ascende perma but to the

wishes of the plants around the pool... one day then, maima having enjoyed  
being part of the chosen family with ascende and perma...

maima was listening to ascende's love with the cannabis flowers... so she grew herself  
into a 2 meter tall flower bud with eyes and ears  
and mouth and vagina with penis like extension... also an anal opening did maima form  
with thick fleshy leaves where hairs dripped from  
crystal clear the potent fluids ascende just came back to the main pool from a  
walk through the little cannabis plant forest he  
and maima had planted in their first years at the pool

BODY;CHARSET=UTF-8;ENCODING=QUOTED-PRINTABLE:he was used to maima changing her  
forms constantly from big to small to big again,  
mixing panther claws with eagle beak, most unseen combinations it was  
materialising herself with... most of the times it did  
not last more than some 10 minutes one mix... but this dripping hairy curly  
orangy fleshy leaf offering maima kept real for hours,  
as ascende was so deeply addicted to this cannabis essential being...  
himself adapting maima's talents and abilities while sharing  
touch and both penetrating it as well as asking maima telepathically to enter  
into his anal and oral openings to deliver the the  
delicacy from its orange hairs aperma came back from a short flight  
while ascende and maima went inside each other...  
she was watching them for a long time with her main focus especially on ascende  
as he was mostly the male, she the female and maima  
the all it wanted to be part of their family

VERSION:1.1

BODY;CHARSET=UTF-8;ENCODING=QUOTED-PRINTABLE:when both ascende as well  
maima were climaxing for the 5th time, perma joined them ...  
witnessing in herself like a huge leap forward quite like a major upgrade  
... as soon as she kissed ascende and savored his  
saliva tasting of cannabis goodness the sweet and tangy rich flavour...  
maima now being released from her passing knowledge

to ascende... was orienting heir wishfullfilling activity towards perma.  
as she knew from their previous sexualcaressing times in the pool,  
perma would not want to stay long with the cannabis theme as she preferred  
other informations... like the seaweed swans appreciate or the  
grass horses eat... so maima grew herself grass and seaweed body parts what  
she massaged permas inner mouth with, gently pushed s  
seaweed knot into her rectum and several into her vagina, moving them around in  
concerto... perma was surrendering completely to  
this unexpected blessing in form of body opening massages... it tought her the  
insides of the grass plant being ... she saw before  
her inner eye the life juices moving inside maimas now mostly grasseaweed  
body=0D=0Awhile her vulva anus mouth full of the seaweed  
knots and grass leaves... being moved gently... perma felt several waves of cummings...  
her body convulsing and remounting erupting  
with orgasmic fluids saliva vaginal secretions and anal gland fluid...  
it all being thankfully swallowed and truly tasted analised  
by a maima what itself was learning a lot while being the  
pushing dominating sexpartner this time

VERSION:1.1  
BODY;CHARSET=UTF-8;ENCODING=QUOTED-PRINTABLE:maima developped from experienc  
to experience ever grander mindsets ... fuelled with all their  
happy family cumming feelings, there were soon no limits for maima anymore...  
had she at first respected the human traumatatas of all kinds  
forbidden and painfull activities... maima soon was able to heal  
them all from ascende and permas memories... like ascende and perma still  
knew of the past having had the suffering trough abuse... but with maima  
s willing and enjoying bodytransformation

but am both reluctant to use this copyrighted material as textures for maima in the pool fullfilling  
ascende cannabis bud interspecies sex exchange and learning

does not matter as the idea is described clearly and meanwhile

the story has allready progressed into the area where

mary descends  a name what is highly regarded by the author as

mother of god  i am so happy to think about mary as the ascende perma maima

family merging into one physical being what not only has animal

plant human abilities but also can change

---

its fabric and gaseous density 

so to say, when they are with them, they are no more planet bound but can

travel anywhere in the cosmos, adjusting their system to the outside conditions

---

## **Part 5**

**their three bodies growing into one while  
listening to the cosmic wandering experiences of  
mary...**
